- MySQL

Other

- Team Work
- Marketing
- Entrepreneurship

- Product Ownership
- Test Driven Development

Interests

- (Kite)surfing
- Tabletop games
- Travel
- Going out
- Writing
- Hiking

Profile

I am a motivated individual that prides himself in having a lot of experience in (full-stack) web- and app-development, working extremely fast and creating high-quality end-products.

The coming years my plan is to use my coding and leadership skills to develop humane mobile- and web-apps. I plan to get Senior Developer, Lead Developer, and CTO roles while growing my Software Development Agency.

Education

- **2017: Diploma** - University Of Groningen (RUG), Bachelor, Artificial Intelligence
- **2012: Diploma** - VWO, Zernike College Westerse Drift, Haren, The Netherlands

Experience

****CoworkSurf****

Timeframe

September 2021 - present

Position

Chief Technology Officer (CTO) & Co-Founder

Stack

React, Next.js, Node.js (Full Stack TypeScript)

Probably the project I'm most proud of. Together with the 3 other founders, within one month I have successfully launched the MVP website: a booking platform for shared housing for remote workers at surf locations. The hardest part of this app was the complex logic of booking accommodation, the Stripe integration, and the optimal image delivery. Have a look at www.coworksurf.com
